

Ignacio Diago Valeta

AI Engineer · LLM Fine-tuning & Computer Vision

Vinalesa, Valencia, Spain | nadiva1243@gmail.com | linkedin.com/in/ignacio-diago | github.com/iDiagoValeta | huggingface.co/nadiva1243 | portfolio-chat-aouj.onrender.com

PROFESSIONAL SUMMARY

Computer Engineer specializing in applied AI—bridging general-purpose models and production-ready systems. Hands-on experience fine-tuning LLMs with PEFT/QLoRA, building end-to-end RAG pipelines, and deploying Computer Vision systems using Vision Transformers (ViT). Skilled in orchestrating multi-agent architectures for complex workflow automation. Currently engineering AI solutions for a large educational institution.

TECHNICAL SKILLS

LLMs & NLP:	Fine-tuning (PEFT/QLoRA), RAG Pipelines, Llama 3, OpenAI API, LangChain, LlamaIndex, Ollama, ChromaDB, Prompt Engineering, HuggingFace Transformers
Computer Vision:	Vision Transformers (ViT), Transfer Learning, Real-time Gesture Recognition, OpenCV, MediaPipe
ML Frameworks:	PyTorch, TensorFlow, Scikit-learn, Keras, Hyperparameter Optimization
MLOps & Tools:	Git, Linux, HuggingFace Hub, Weights & Biases, Docker (basics), Azure Document Intelligence, Azure Functions
Programming:	Python (advanced), SQL, R, C
Data Science:	NumPy, Pandas, Data Mining, Feature Engineering

PROFESSIONAL EXPERIENCE

AI & Back-End Developer

CEU Educational Group · Valencia, Spain | Oct 2025 – Present

- Developed and deployed **GPT-CEU**, a custom Generative AI assistant using OpenAI API and RAG pipelines, optimizing academic and administrative workflows across the university.
- Engineered end-to-end LLM pipelines connecting language models to institutional data sources, enabling real-time retrieval for staff and students.
- Collaborated with cross-functional teams to translate educational requirements into AI-driven technical solutions, accelerating process automation.

Workshop Instructor & Museum Guide

UPV Informatics Museum · Valencia, Spain | Feb 2025 – Jun 2025

- Designed and delivered technical workshops on Robotics, Cryptography, and Programming to students across multiple educational centers.
- Led guided tours on the history of computing, adapting technical communication to diverse audiences.

Private Tutor

Superprof · Valencia, Spain | Jan 2022 – Jan 2025

- Provided tailored instruction in Mathematics, Physics, and Technical Drawing to secondary and pre-university students, achieving consistent measurable improvements.

KEY PROJECTS

Local On-Premises RAG System (Senior Thesis): Open-source document intelligence pipeline using Ollama, ChromaDB and LlamaIndex with hybrid semantic + keyword search—no external API dependency.

OCR-to-CRM Automation Pipeline: Azure Function converting handwritten academic enrollment forms into CRM records using Azure Document Intelligence, GPT and fuzzy matching. Deployed in production at CEU.

LLM Domain Fine-tuning Pipeline: PEFT/QLoRA fine-tuning of Llama 3.2 1B with ORPO preference optimisation; local deployment via Ollama with a ready-to-use GGUF model and integrated evaluation benchmarks.

EDUCATION

B.Sc. Computer Engineering — Computing Specialization

Universitat Politècnica de Valencia (UPV) · Valencia, Spain | 2022 – 2026 (Expected)

- Specialization in Computing: algorithms, data structures, parallel computing, and advanced mathematical foundations.
- Coursework in Artificial Intelligence, Machine Learning, and software architecture.

CERTIFICATIONS

Machine Learning & Data Science · Python for Data Science · Linux Fundamentals · SQL & R for Data Analysis · Mathematical Foundations of ML (all via edX)
